

KYLE WOODS

Data Analyst & Analytics Engineer

kylewoodsdata@gmail.com • (801) 759-2855 • Salt Lake City, UT • [linkedin.com/in/kyle-woods-data/](https://www.linkedin.com/in/kyle-woods-data/)

SUMMARY

Data analyst and test engineer with 9 years building the data infrastructure, pipelines, and dashboards that drive product and business decisions. Strong foundation in SQL, R, Python, and dbt with hands-on experience across IoT telemetry, consumer research, and BI development. Proven ability to take raw data at scale, model it into clean analytical layers, and deliver insights that inform marketing, product development, and executive strategy. Seeking to pivot into a full-time Analytics Engineer, BI Developer, or Data Analyst role.

EXPERIENCE

Senior Test Engineer & Data Analyst, Traeger Grills

Oct 2021 — Present

- Developed consumer segmentation model analyzing 90 days of user data across 5 million rows using SQL, dbt, and R, producing a segmentation report that directly informed marketing strategy and new product development directives
- Built and deployed custom R APIs (plumber/shiny) on a Dockerized Linux server, integrating AWS, IoT data, and DAQ software so test technicians trigger automated analysis at test start and receive polished results automatically, reducing analysis time 83% (30 min to 5 min)
- Designed and maintained BI dashboards in Grafana and Domo for automated reporting on field tests, beta programs, and product performance; delivered findings to engineers, product managers, and executives
- Modeled and queried IoT telemetry database (PostgreSQL/TimescaleDB) to surface fleet-wide product performance trends, enabling faster response to field issues
- Defined metrics and algorithms to evaluate product performance; built reusable analytical frameworks and reporting pipelines across multiple product lines
- Recognized with Traeger Employee Award for advanced application of AI technology to build new team tools and empower others to adopt emerging methods in everyday data work

Technologies: SQL, dbt, R (tidyverse, ggplot2, shiny, plumber), Python, Grafana, Domo, AWS, Jira/Confluence

Test Engineer, Traeger Grills

Jan 2018 — Oct 2021

- Obtained satellite laboratory accreditation for in-house certification testing, reducing time to certify products by 50%
- Developed 35+ standard test procedures to holistically validate product performance based on certification requirements, product specifications, culinary results, and manufacturing constraints
- Built data collection and reporting pipelines for structured test programs; trained 10 engineering interns in data collection, analysis, and documentation
- Coordinated cross-functionally with design, manufacturing, and suppliers to identify and resolve product issues during new product development

EDUCATION

University of Utah, Continuing Education - Data Science

2022 — Present

- Completed courses in Databases, Visualization, Scientific Computing, and Foundations of Data Science

University of Utah, B.S. Mechanical Engineering

2012 — 2016

Gonzaga University, B.A. Psychology and Sociology

2007 — 2011

PROJECTS

Consumer Segmentation Analysis

- Modeled 5 million rows of 90-day user data using SQL and dbt to build clean analytical layers; visualized segments in R (ggplot2) to produce a segmentation report that shaped marketing and product development strategy

IoT Telemetry Dashboards

- Built Grafana dashboards querying PostgreSQL/TimescaleDB fleet data for real-time and historical product performance monitoring across beta and production device populations

Data Visualizations

- Interactive dashboard in JavaScript/D3 to visualize and explore trending song data from Spotify Charts
- Grafana dashboards for Traeger grill performance data, Jira dashboards for daily status updates of tickets

SKILLS

- Code: SQL, dbt, R (tidyverse, ggplot2, shiny, plumber), Python (scikit-learn, pandas, matplotlib), JavaScript/D3
- Tools: Grafana, Domo, AWS (Redshift, IoT data infrastructure), Jira/Confluence, Salesforce, Docker, MS Office
- Methods: Data modeling, pipeline development, BI dashboard design, consumer segmentation, survey design, statistical analysis

CERTIFICATIONS

dbt Fundamentals, dbt Labs	2026
Root Cause Analysis Certification	2023
Dewesoft Sensors and Instrumentation Certificate	2020
